DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-27, drawn to bus architecture comprising primary and secondary buses.

Group II, claim(s) 28 and 29, drawn to an apparatus for determining device availability in a bus architecture.

Group III, claim(s) 30-33 and 39, drawn to a packet based arbitration method and apparatus for a computer bus.

Group IV, claim(s) 34-38, drawn to a data request matching apparatus for matching the identity of a requesting device with data retrieved from a storage device.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The only general inventive concept linking the groups together is "providing efficient data transactions in a bus-based system" which is not a unique special technical feature, as evidenced by US Patent Number 5,481,681 to Gallo et al. ("Gallo") (See Abstract).

Art Unit: 2111

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
